

Malik Medhat

Backend & Full-Stack Software Engineer (Java / Spring Boot)

Giza, Cairo, Egypt | +20 1011091749 | malikmedhat77@gmail.com | linkedin.com/in/malik-medhat | github.com/MalikMedhat

EDUCATION

Helwan University

Sep 2023 – Present

Bachelor of Business Information Systems (BIS)

Cairo, Egypt

Relevant Coursework: Advanced Databases, Systems Design, Python Programming, Web Development, E-commerce Systems, Data Security, Operating Systems

KEY PROJECTS

E-Commerce Full-Stack Platform

Java, Spring Boot, Spring Security, JWT, React, TypeScript, MySQL, Docker

[GitHub Repository](#)

- Architected a scalable backend with a clean layered structure (`config`, `controller`, `dto`, `model`, `repository`, `security`, `service`) using Spring Boot and JPA/Hibernate ORM over a MySQL database
- Engineered stateless authentication and authorization with **Spring Security** and **JWT**, including custom security filters, token validation, and secure user registration/login flows
- Enforced **Role-Based Access Control (RBAC)** across protected endpoints to restrict sensitive operations by user role
- Integrated the **Stripe** payment gateway for secure checkout, payment processing, and order lifecycle management
- Developed a responsive **React/TypeScript** frontend with Vite, featuring dynamic product filtering/search/sort and a real-time shopping cart
- Containerized the full application with **Docker** for consistent local and production environments

AI Chatbot Platform

Java, Spring Boot 3, Spring AI, Groq API (Llama 3.1), HTML/CSS

[GitHub Repository](#)

- Built a high-performance generative AI backend using **Spring Boot 3** and **Spring AI** with an OpenAI-compatible architecture
- Integrated **Groq Cloud Services (Llama 3.1)** for low-latency AI response generation with zero local model overhead
- Designed modular backend abstraction layers to support dynamic API key management and seamless model switching

Real-Time Chat Application

Java, Spring Boot, WebSockets

[GitHub Repository](#)

- Engineered a real-time, bidirectional messaging application using **WebSockets** for low-latency communication
- Handled concurrent user connections and message broadcasting across a scalable Spring Boot backend

TECHNICAL SKILLS

Languages: Java, TypeScript, JavaScript, SQL, Python, PHP, HTML5, CSS3

Frameworks & Security: Spring Boot, Spring Security, JWT (JSON Web Tokens), Spring AI, React, RESTful APIs, WebSockets, JPA / Hibernate

Databases & DevOps: MySQL, Docker, Git, GitHub, Postman, Linux, Vite, Tailwind CSS, Bootstrap

AI Tools & Workflows: Claude (Anthropic), GitHub Copilot, Devin AI, Cursor, Kimi, Google Gemini, ChatGPT

CERTIFICATIONS

- **Claude with Google Cloud's Vertex AI** — Anthropic (Jun 2026)
- **Java (Basic) Certification** — HackerRank (Jun 2026)
- **AI Fluency: Framework and Foundations** — 2026

LANGUAGES

Arabic: Native | **English:** Fluent (C1) | **German:** Upper-Intermediate (B2)
