Portfolio

PROFESSIONAL SUMMARY

Software Engineer with hands-on experience designing and shipping full-stack Java and Spring Boot applications. Built a production-grade e-commerce platform featuring JWT authentication, RBAC, Stripe payments, Spring Security, and Docker containerization. Developed an AI chatbot platform leveraging Spring AI and Groq API for real-time, low-latency inference.

PROJECTS

E-Commerce Full-Stack Platform

Java, Spring Boot, Spring Security, JWT, React, TypeScript, MySQL, Docker

GitHub

- Architected a scalable backend with clean layered structure (config, controller, dto, model, repository, security, service) using Spring Boot and JPA/Hibernate ORM over a MySQL database.
- Engineered stateless authentication and authorization with Spring Security and JWT, including custom security filters, token validation, and secure user registration/login flows.
- Enforced Role-Based Access Control (RBAC) across protected endpoints to restrict sensitive operations by user role.
- Integrated Stripe payment gateway for secure checkout, payment processing, and order lifecycle management.
- Developed a responsive React/TypeScript frontend with Vite, featuring dynamic product filtering/search/sort and a real-time shopping cart.
- Containerized the full application with Docker; implemented Spring Testing for unit and integration test coverage.

AI Chatbot Platform

Java, Spring Boot 3, Spring AI, Groq API (Llama 3.1), HTML/CSS

GitHub

- Built a high-performance generative AI backend using Spring Boot 3 and Spring AI with an OpenAI-compatible architecture.
- Integrated Groq Cloud Services (Llama 3.1) for low-latency AI response generation with zero local model overhead.
- Designed modular backend abstraction layers to support dynamic API key management and seamless model switching.

Real-Time Chat Application

Java, Spring Boot, WebSockets

GitHub

- Engineered a real-time, bidirectional messaging application using WebSockets for low-latency communication.
- Handled concurrent user connections and message broadcasting across a scalable Spring Boot backend.

EDUCATION

Helwan University

Sep 2023–Present | Cairo, Egypt

Bachelor of Business Information Systems (BIS)

Relevant Coursework: Advanced Databases, Systems Design, Python Programming, Web Development, E-commerce Systems, Data Security, Operating Systems

TECHNICAL SKILLS

Languages:	Java, TypeScript, JavaScript, SQL, Python, PHP, HTML5, CSS3
Frameworks & Security:	Spring Boot, Spring Security, JWT, Spring AI, Spring Testing, React, RESTful APIs, WebSockets, JPA/Hibernate
Databases & DevOps:	MySQL, Docker, Git, GitHub, Postman, Linux, Vite, Tailwind CSS, Bootstrap
Cloud & Deployment:	Railway, Vercel, Groq API

CERTIFICATIONS

- Claude with Google Cloud's Vertex AI – Anthropic, Jun 2026
- Java (Basic) – HackerRank, Jun 2026
- AI Fluency: Framework and Foundations – 2026

LANGUAGES

Arabic: Native | English: Fluent (C1) | German: B1
